NILESH RANE

The Founder of Capapie

"A speeding bullet never waits for anyone and neither did I, when I found my passion for shooting. I decided to do something about it and founded Capapie in order to give the BEST TO THE BEST"

ARMED FROM HEAD TO TOE

The French say it and we stand by it.

Capapie brings to you, the world of shooting apparel. We look out for your needs from your first shooting lesson to your finals.

Capapie was founded in 2001 by Nileshe Rane who himself is a former Indian National Record Holder in the Free Rifle 3 Position Men Event and currently a passionate target-shooter. Through Capapie he decided to produce and showcase a wide range of top-level sportswear to be worn for all kinds of competitions.

RUPALI RANE

A woman who walks the purpose

"I found myself in Capapie. It has set my soul free and at the same time helped me make an impact on sports world around me"

DEFINED THE GOAL & ACTIONED WITH FOCUS

Rupali is an entrepreneur who inspires and guides the business with her advanced management techniques, strong system knowledge and her decision-making skills. In 2005 Rupali married Nilesh Rane, a man of passion with a mission to reach, support and upgrade the shooters globally.

Rupali decided to take the plunge in the business with a desire to create a niche in the sports business world, to break the stereotype trends and go beyond. She has poured herself in Capapie and devotes her mind, heart and labor to establish the enterprise globally. Rupali can be summed up as a doer who sees possibilities, and sets about achieving them with small but determined steps every day.

INTRODUCING CAPITEX®

Raising the bar alone doesn't automatically make you improve. You need to back it up with organized effort.

Capapie Sports Equipments has come out with CAPITEX®, an advanced Sportswear Material after 2 years of sustained research and development.

CAPITEX® is in accordance with the ISSF rules of thickness and shows perfect reading on the stiffness gauge. Weather change of any kind does not affect the performance of this material as per ISSF norms. It is wrinkle free Bounce Back Material (BBM) and gives consistent results.

CAPITEX® blends perfectly with rubber. Though CAPITEX® is a strong and stiff material, it gives a canvas type feeling to the shooter unlike plastic or rubberized materials. To the benefit of the shooters, this quality lasts for years.

Even after a rigorous use, this material bounces back to the original condition in few hours, and thus gives the long-lasting new feel and support to the shooter.

Multiple medals winner at World Cup and World Championships

NSG CAPITEX® TOPLINE JACKET

Jacket Item Code: 1015

CAPAPIE SCORE 10.9

Extended top grip padding for better positioning of butt plate in prone and kneeling position.

Anatomically cut leather button-hole panel for perfect body fit at neck area.

Wide top grip reinforcement for firm grip of butt plate in standing position.

Innovative Control Box Concept (CBC) (DESIGN REGISTERED)

Breathing Stabilizer

In Standing Position when shooter is completely relaxed, his normal breathing causes in and out movement of the stomach. This affects the stability of the shooter.

Breathing stabilizer absorbs this movement and improves his/her stability.

Soft full chrome leather for extra comfort.

Soft, thin and sweat free fabric inside elbow area to bring rifle-holding hand close to body.

Original Capapie "Quick Draw Holster" Pocket. (DESIGN REGISTERED)

Black Suede leather gives maximum grip to the rifle-holding hand.

INNOVATIVE CONTROL BOX CONCEPT (CBC) (DESIGN REGISTERED)

As Per ISSF rule no. 7.6.1.3. rifle should not touch the jacket. Hence, we have invented a very innovative Control Box Concept (CBC). We observed and studied many international shooters in their natural shooting environment. Sustained research established that with the CBC, the bulge created by the rifle supporting hand is eliminated. Now instead of the bulge, you have a cavity!!!

The Secret actually lies in the unique quality of Special Elastic Fiber, which comprises the Control Box. Special elastic fiber stitched vertically in the CBC pulls back the extra material, which was responsible for creating the bulge.

Hence, the Shooter can bring the rifle as close to the body as they can, and shoot comfortably.
